

Hello,

As a housing provider who is barely (almost) paying their mortgages with rental income, I oppose LC-18 very strongly. My bank will not forgive 20% of my mortgage payments, so that loss of income will come directly out of my pocket.

Why are the people at the bottom of the "trickle-down" always the ones who take on the burden of supporting the mega-rich corporations? When it is time for a free bailout with no interest and no repayment, the wealthy always get their pockets filled - with our money.

Please stop passing the debt. Not all of us who own rental property can afford our income cut by 20% during a pandemic. If we were billionaires, we would be getting much richer right now - but we're not.

Stop corporate welfare and instead get us a COVID relief package that helps the citizens of this nation. That is why we pay taxes.
