It is vital to extend protections to tenants! This should include the rent increase freeze. I understand a landlord's position, they also have mortgages, but most are not looking at being homeless.

As a renter, many of us have because of COVID-19 lost our jobs or had our hours, therefore our income, reduced substantially. Some are STILL waiting for the unemployment. Our landlords are biting at the bit to increase our rent by 10% or more, because that is what is allowed. But without the income because of COVID we cannot pay it, anywhere. And the relocation assistance does not apply if there are four or fewer units, which is ridiculous. So we are just out on the street, regardless of if we are immune compromised.

Additionally, the landlords try to sneak realtors inside our homes during the peak of this pandemic to prepare to sell it without any warning.

Our landlords do not care. They have multiple properties and other business and multiple homes. They make plenty of money. We need help just staying in our one, very humble, rented home, where I have lived and paid rent reliably for over 11 years.

We need help. We are terrified.
