

I don't know why I have to forgive 20 percent of my real estate income. I've worked hard all my life to have my retirement income from my real estate assets. I can't afford to lose that income. The tenant should be responsible for their share. Please be fair about this. Make the tenant pay their share or reward us the total amount due. Put yourself in our place. Would you want to give up 20 percent of your income of no fault of your own?

Thank you

Joan Krause
