

Hello:

I would like to ask that landlords not be further punished in this situation of not receiving rent, full rent for their properties. It is our business and our income and no other industry is forced to provide a service or a product and told that they cannot receive payment for that service or product. What other part of the economy is being forced to do this? The other most affected industry is the restaurant industry, but they are not being forced to provide meals, pay wages, and all costs and then receive no income. At least they can close their doors and not incur the expenses of running the business while being REQUIRED to provide their service. Seriously what other industry or business have you required to stay open for business pay all of the costs but told that they can not ask for payment. I would like the answer to that question. Enough is enough. Let government pay the rent for those who REALLY cannot pay, and those who are just taking a free ride because they have been allowed to with NO documentation start paying ASAP !

A totally disillusioned Landlord, ready to quit.
