

Hello,

My family has been putting up with a very abusive landlord since August. She serves me notices to vacate or to do inspections during the freeze and is now trying to use my denial of entry as a way to evict me. I was out of work for a month because of my personal Covid symptoms. My son has been out of work for months because he works in the restaurant industry and is still waiting on unemployment. My daughter works for an airline, who again has taken a hit. I have been able to pay some months and others I cannot. I am being threatened now how I will be living out in the snow with my 2 kids since this recent rent freeze will be ending. I am asking that you extend it until our lives can get back to normal. And you postpone the evictions and rent that will be due Jan 1st due to the last rent freeze. She has threatened to sell the house just to get us out, this is consuming her and she will do anything - even sell her house to get us out. We do not rely on public assistance and usually do very good financially as a household, this year has just hit us hard. [REDACTED] [REDACTED]

Thank you for your time,

Tina James
