

Dear legislators,

Has anyone considered that the increasing homeless population that Bend, and Oregon in general is inviting to stay here raise the costs for everyone? What about retirees on a fixed income should they pay more taxes? When they have worked their whole lives unlike the drug addicts littering and disrespecting our streets and property.

Or how would you like it if you were being charged 875.00 a month for a bare bones federal health plan when you can barely afford your property taxes? Where are the critical thinkers here? Who creates these laws? Why are they skewed to benefit only the Irresponsible growing portion of our population while decimating the shrinking portion of our cities which actually pay the bills and prop up the infrastructure? Do you want those people to leave? Because you are doing your best to achieve a state of degenerates and second homes where no one actually lives.

Start using your noodle and stop this ridiculous grab for money.
