

Dear Committee Members,

I love love love the Congressional plan B based mostly on county boundaries.

It feels to me that this plan keeps natural affinity groups together allowing strong urban representation in districts one and three, and suburbs largely in six and one, and rural interests largely in two, four and five.

Looks to me that all incumbents are accommodated and that the new 5 is open.

I also like that OSU and U of O fall in separate districts allowing each to have a champion in WDC.

I like that Benton, Linn, and Lincoln are all in the same district and are tied together by highway 20 and their common COG.

I like that new 5 is tied together both by the maritime interests of the coast and Columbia river, as well as tourism and Hwy 101.

Please use this scheme as the base for state districts. (Senate Districts Plan B)

I like that Corvallis and Albany are together in dist. 8

The other senate districts within new congressional 5 also seem to have commonalities of interest and transportation.

Thankyou for this opportunity to comment!
