

It is out of control to lump rural logging country with Eugene. We need to be represented by a republican who is completely in touch with our republican community. I know our governor is a liar, a theif, and a socialist and will do what lines her pocket and not what is best for the people of her state. I emlore you to exercise your oath and promise to work for us. Do what is right and redistrict in the manner that representation is matched with the area.
