

I see the redistricting is changing for the Sandy area. Splitting the school district does not help our voting area. Dividing the city of Sandy does not help our voting area. The communities along Hwy 26 use Sandy for their major needs. Separating them from Sandy does not help our voting area. The demographics of the community should be consistent for the voters. Bringing in the Dalles makes no sense. They are different people with their needs compared to Sandy residents. Mountain needs are not the same as plains needs. Put Sandy area in District 52 so people are getting equal representation with their vote.

Sincerely,

Dave Kaechele concerned district 3 resident
