Is this what we've come to? Not even an attempt to pretend that there will be a moderately equitable representation of Oregon? Portland is doing such a great job that they should choose 4 of our house seats? What a JOKE!!!

How has Oregon been feeling to you now that you have had a supermajority for a while? Are you actually loving homelessness, lawlessness, fleeing families and businesses? The best times in this state were when power was balanced and both sides worked together.

The best thing you could do for our state is apologize to your conservative neighbors for constantly pretending they don't exist, and prove you mean it by offering a fair redistricting.

If you actually care about our state, do the right thing. Set us all up for a future together.
