

For the record, my name is Jennifer Woodward, resident Marion County.

I urge you to vote on congressional map redistricting Oregon to submitted MAP B.

Oregon's congressional districts should be divided by geographic markers and no district should be split through a community or county. Central and eastern Oregon have little to no representation under the current districting.

The representation of Portland and its population size alone carries a heavy weight on the outcome of our elections. This is silencing hundreds of thousands of voices and votes all over our state. The updated map must account for high growth areas such as central and southern Oregon.

Both majority party registrations should be fairly and adequately represented in our elections. Map B is the most logical based on Oregon's 10 year growth and current demographic population. By voting to redistrict MAP B we will be able to accomplish the goal of fair elections.

Again, I urge you to vote to redistrict district Oregon to the submitted MAP B.

Respectfully,

Jennifer Woodward
