

To: the Redistricting Committee, The Oregon State Legislature, Oregon Secretary of State

For far too long Oregon has been ruled by it's population centers comprised mostly of constituents from one party. Thus, leaving the vast majority of Oregon land owners, counties, and cities under represented at the State level. This system was purposefully installed during the last redistricting, the result of which is open and obvious. Building and incorporating maps that tied areas with vastly different needs and desires, in order to assure that a majority of the legislatures were from one party, is not only illegal, but immoral. This disenfranchising of the rural Oregonians, who grow your food and desire equal representation, has to stop. Please follow the ORS requirements and return to the Oregon of fairness and legitimacy.

Rod Schilling, Coos County
