

I live in Congressional District 3 near Sandy Oregon.

I support Legislature House Plan C with one major change. The plan violates criteria to not split up communities or public and local governmental boundaries. The City of Sandy should remain entirely in District 52. Sandy is a vital part of the Sandy River valley community, from the City of Sandy to Timberline, and includes many cooperative programs like the Public Libraries. This plan also splits the Oregon Trail School district which also violates redistricting criteria. The population addition with adding the City of Sandy to District 52 in this plan can be compensated by removing the City of The Dalles or unincorporated communities on the west or south side of District 52.

I support Plan A Congressional District map.
