

RE: Redistricting Option B!!

I would like to encourage the members of the Redistricting Committee to select Option B for Congressional, State Senate and State House Districts.

Options B are the only maps that are set up so that:

- The lines are contiguous.
- They have equal population.
- There are no unnecessary divisions of people with the same values!
- The transportation links are logical.
- They keep existing geographical & political boundaries.

We need to have fair representation in this state! Option B for all districts will provide that. The other options absolutely will not, 40% of the population will be determining who represents us. I'm tired of living in a state run by people who have been elected by a very limited geographical area. There is a reason why people are moving out of Oregon or pushing to join a neighboring state. I grew up in Klamath County! I want FAIR representation in my home state!

I can't stress how vital this is to ensure that We the People of this great state have these districts set up in a way that is fair to the entire population.

Sincerely,

Deborah Rodgers
Klamath County PCP District 11
