

To The Honorable Representatives and Senators of the Redistricting Committee:

Oregon is approximately 30 million acres; 98,000-plus square miles; home to 4,000,000-plus residents; and, most importantly, is comprised of many different geographical identities.

Coastal.

Urban.

Metropolitan.

High Desert.

Agricultural.

Timber.

Scenic/Tourism.

To try and co-mingle the residents of Harney or Morrow County with the residents of Multnomah or Clackamas County under one congressional district (or similar house or senate district scenario) does a huge disservice to those in the lesser-populated and geographically dissimilar counties. The fact that three counties in the “metropolitan” area comprise over 48% of the population, and thereby quite often control election outcomes, is grossly out of proportion. Trying to split those districts and merging them with the lesser populated areas to even out the disparity only increases the likelihood that the end result will be a state further divided by their differences.

The residents of these different geographical locations deserve to be represented AMONGST their peers BY their peers. A fair and non-partial redistricting plan is owed ALL the people of Oregon.
