

Dear Redistricting Committee,

I am a Lane County resident of a few decades, and I support map c for the state senate and map a for congress. It is important for me to have our country in one district because I greatly value our local and sustainable agriculture community. I know many people like me are drawn to Lane County because of our agricultural and cultural traditions ( CSAs, fairs—both county and country!, tourism that reaches from sea to farms to mountain passes, extension service, farmers' markets, botanical diversity and richness, etc) and I'd like our rep to share those concerns. Part of my draw to Oregon was the richness of its farmland, and the devotion of its denizens to their farmers and nursery folk. We now are reaching a pivotal moment in which many of these things will be at risk because of climate change. I hope we overcome our differences and unite on this front in my emerald county.
