

To Whom it May Concern,

I live in House District 12, and Senate District 6. I am very happy with my representation. I am a Springfield resident. I strongly favor Congressional Map A, because it keeps Lane County together along with Corvallis and the coast. These communities share a lot of values and concerns. We are well represented in Congress.

I strongly favor State Senate Map C. It is imperative to keep Glenwood, Springfield, and the University of Oregon areas together in terms of state Senate representation.

Many University of Oregon students and workers live in Springfield and use the transportation corridor through Glenwood to commute, shop, and dine out.

The LTD rapid transit bus lines run through Glenwood, linking the University of Oregon and Springfield. University of Oregon workers and students use LTD rapid transit to commute to and from Springfield. The redevelopment of Glenwood will make this corridor even more important.

It is also common for University of Oregon students to serve as interns for the city of Springfield.

Springfield, Glenwood and the University of Oregon are closely linked communities and should be represented together in the State Senate.

Thank you for reading my testimony.
