

Redistricting Committee:

I live in southern Oregon. My congressional district #2 is one of the biggest in the United States. I feel very removed from my US Representative who lives hundreds of miles from me. I want redistricting lines to be drawn to represent communities: geographical districts that make sense. I do not want gerrymandered districts that give either party an advantage. Please work together in the true spirit of Oregon.

We do things differently here. Thanks for your hard work with this very important job.
