

This is all about fair maps and districts correct? I will be honest here. Portland and Jefferson County could be considered oil and water. They don't mix. So don't. Portland politics have destroyed and killed the city and so with all do respect... stay out of Jefferson County.

We have our own culture. We have our families. We have our standards. We have our own economy. We have our squabbles. We have our own issues. We have our own blessings. We have our curses. And with any and all of this... we don't want anything from Portland. The leadership of Portland is terrible and chaotic and at best... only understands its own patrons. So keep you stuff there.

Jefferson County is the gem and jewell it is because Portlandia isn't here and the more Portlandia infiltrates our great district the worse it gets.

I can get specific about all the nuance having to do with economic, statics, rural standards and such. We all know... as do you... why you want to do re-district us to include Portland.

We are advised to keep this nice and politically correct because our great Republican leaders are very respectful and my hats off to them because they play by the rules.

Well, Dems and the idiot left doesn't give a hoot about fairness. You know, I know it... We all know.

But I am not them and I know your kind...

So... FUCK YOU!!! STAY THE HELL OUT OF CENTRAL OREGON YOU POS!
