

I live in HD15.

I am writing to support Plan B for HD15. I see that the two other plans will change the boundaries of this district in such a way as to eliminate the possibility of having a Republican representative from this district. This district is designed right now to represent the majority of the way people think and live their lives in Linn County. To change the lines in the way that plan A and C show would pull people who do not think and live this way and change the voting block for this county. It also chops up school districts. This would be obvious gerrymandering. If you don't want people in this district to believe that you are doing this to eliminate our votes, then I highly recommend you leave it as is.

Sincerely,
Colleen Anderson
