Recap of Recent Engagement

Executive Steering Group

 Received Concurrence to move forward on the IBR Desired Outcomes, Screening Criteria Process, and Preliminary List of Design Options

Equity Advisory Group

- Recent Work:
 - Continued creation of the Equity Framework
 - Supported development of equity-focused screening criteria for Design Options
 - Informing the links between climate and equity
- Coming Up:
 - Completing the Equity Framework
 - Beginning to develop equity performance measures

Community Working Groups

- September/October
 - Discussion on existing conditions, user experience, and priorities for the program
- November
 - Feedback on preliminary list of design options

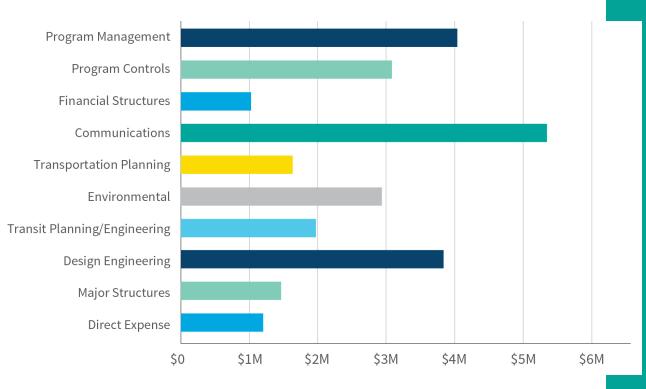

Overview of Current Program Expenditures

Current Expenditures

IBR PROGRAM WORK	Spent through August 2021	
WSDOT	\$1,772,621	
ODOT	\$609,410	
General Engineering Consultant	\$18,438,628	
Intergovernmental Agreements	\$155,760	
TOTAL	\$20,976,419*	

^{*}Spending reflects all costs associated with program work since efforts reinitiated in July 2019, including labor, equipment, and expenses

Expenditure Breakdown by Current Areas of Work**

Screening Process to Evaluate Options

Chris Regan, Environmental Manager

Moving towards an IBR Solution

Program-Level Desired Outcomes

PROGRAM PRIORITIES

- ▶ Purpose and Need
- ▶ Climate
- ▶ Equity
- ▶ Cost/Financing

DESIRED OUTCOMES AND MEASURES

- What the program is seeking to achieve and how to measure success
- ▶ Vision and Values
- Community Values and Priorities, informed by community engagement and CAG
- ▶ Equity and Climate Frameworks

Desired outcomes identify screening measures

Screening

IDENTIFY SCREENING CRITERIA

- ► Identify specific screening criteria and metrics informed by CAG, Equity Framework, Climate Framework, Technical experts, partner agencies, community engagement
- Criteria and metrics will identify tradeoffs/differences between design options

EVALUATE

- Evaluate design options based on screening criteria
- ▶ Delineate the differences across design options

RECOMMEND

► Identify technical recommendation to inform consideration by advisory and steering group recommendations

Design options are filtered during screening

Design Options

PRIOR PLANNING EFFORTS

► Major program components from 2013

CHANGES SINCE 2013

▶ Physical, regulatory, and community priority changes

DESIGN OPTIONS

▶ Identify design options in response to the changes and in consideration of climate and equity

Consideration and Recommendation

- ▶ Advisory and steering groups consider the technical recommendation in aligning around the IBR solution
- ▶ Recommended IBR solution moves forward to Bi-State Legislative Committee

Draft IBR Solution

CONDUCT DETAILED EVALUATION IN THE SUPPLEMENTAL DRAFT ENVIRONMENTAL IMPACT STATEMENT

Moving towards an IBR Solution

Program-Level Desired Outcomes

PROGRAM PRIORITIES

Consideration and Recommendation

- ▶ Advisory and steering groups consider the technical recommendation in aligning around the IBR solution
- ▶ Recommended IBR solution moves forward to Bi-State Legislative Committee

Draft IBR Solution

CONDUCT DETAILED EVALUATION IN THE SUPPLEMENTAL DRAFT ENVIRONMENTAL IMPACT STATEMENT

PURPOSE AND NEED ELEMENTS	DESIRED OUTCOMES
1. Travel demand and congestion	More people can move through the program area.
	Travel times through the program area are faster and more predictable.
	People of all ages, abilities, and incomes have access to move through the program area, regardless of mode.
	Regional trips stay on I-5.
2. Freight movement	Freight travel through the program area is more reliable.
	Freight travel times through the program area are faster.
	Accommodates high, wide, and heavy cargo in existing and future routes.
3. Public transportation	More people use transit.
	Travel by transit is competitive with other modes.
	Transit connects people to their origins and destinations.
	Travel by transit is predictable, reliable, and consistent.
	More people have access to high-quality, affordable, and reliable transit.

PURPOSE AND NEED ELEMENTS	DESIRED OUTCOMES
4. Safety	Reduce overall crashes on I-5, including severe injury and fatal crashes.
	Reduce overall crashes, including severe injury and fatal crashes, on I-5 ramps, local streets, and active transportation networks in the program area.
	Fewer diverted trips from I-5 to local streets.
5. Bicycle and Pedestrian	Safety is reflected in designs for all modes. Active transportation is an attractive mode, and more people walk and cycle, both to access transit
	and instead of travelling by autos.
	Traveling by walking, biking, and rolling feels safe because facilities are separated from moving vehicles and the shared use path environment is visible and connected.
	The high-quality networks for walking/biking/rolling are convenient and connect destinations that are important for most trips.
	More people have access to high-quality active transportation facilities.
6. Seismic	Bridges will be designed and constructed so that they will not collapse and will remain operable in a Cascadia subduction zone earthquake.

CLIMATE CHANGE & RESILIENCY

Reduce GHG emissions in support of state climate goals.

Minimize operational and embodied carbon during construction.

All structures are resilient to and operable following anticipated climate disruptions (e.g., heat events, flooding, sea level rise).

Program limits other environmental impacts that exacerbate effects of climate change (e.g., heat island, runoff).

EQUITY (as excerpted from the Equity Framework and to be refined by EAG)

Improved mobility, accessibility, and connectivity especially for lower income travelers, people with disabilities, and communities who experience transportation barriers.

Fewer identity-based disparities in travel time, access, transportation costs, and exposure to air pollution, road noise, and traffic crashes.

Local community improvements are implemented in addition to required mitigations.

Economic opportunities generated by the program benefit minority and women owned firms, BIPOC workers, workers with disabilities, and young people.

Equity priority communities have access, influence, and decision-making power throughout the program in establishing objectives, design, implementation, and evaluation of success.

Disproportionate impacts on equity priority communities are avoided rather than simply mitigated.

COST EFFECTIVENESS AND FINANCIAL RESOURCES

Pursue and leverage any and all federal, state, and other funding sources that support all modes and address long-term needs.

Identify equitable tolling and pricing strategies supporting multimodal construction costs and improved operations and access, in coordination with statewide tolling programs and in support of each state's climate goals.

Ensure fiscal responsibility across the program and into the future, including new technology to solve future problems.

Moving towards an IBR Solution

Program-Level Desired Outcomes

PROGRAM PRIORITIES

Draft IBR Solution

CONDUCT DETAILED EVALUATION IN THE SUPPLEMENTAL DRAFT ENVIRONMENTAL IMPACT STATEMENT

Feedback and Guidance:

Does this process seem sufficient to meet your expectations? Is there anything additional that the program should consider?

Preliminary Design Options

John Willis, Deputy Program Manager

Changes in the Program Area

In the years since the previous planning efforts, the baseline conditions, regulatory and policy context, and community priorities have changed.

These changes include:

- Regional, state, and local equity policies and priorities
- Regional, state, and local climate goals and priorities
- Oregon tolling/congestion pricing programs being studied
- Demographics along the I-5 corridor and nearby neighborhoods
- COVID-19 impacts on transportation
- Environmental regulations

- Expanded transit service in the corridor (i.e., VINE BRT and bus-on-shoulder on I-5 in Vancouver)
- Current Regional Transportation Plans and City Comprehensive Plans
- Updates to USACE, USCG and FAA requirements
- Land use policies, planned development, and zoning changes
- Federal transit funding requirements
- Freight/industrial activity

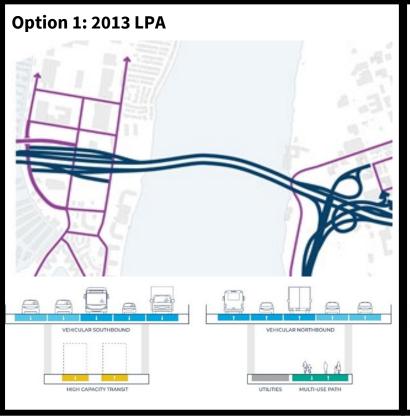

Design Options in Response to Changes

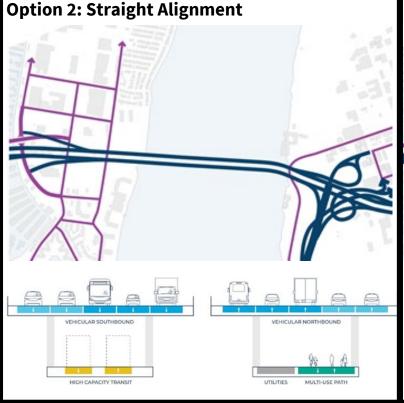

- The program, in collaboration with agency partners, developed high-level design options to respond to changes while incorporating current regional values and priorities into the IBR Solution.
- The design options pertain to the following program areas:
 - Bridge Crossing over the Columbia and Alignment
 - Downtown Vancouver
 - Vancouver Interchanges
 - Hayden Island and Marine Drive Interchanges
 - Transit
 - Bike and pedestrian improvements are integrated into design options for all the above areas

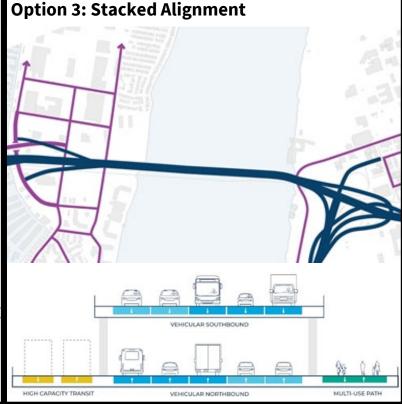

Bridge Crossing over the Columbia and Alignment

- Variety of options that differ in constructability and bridge footprint
- All options provide dedicated transit guideway and wide multi-use path
- Future design work, informed by data, partners, and community engagement, will determine the bridge height and bridge type

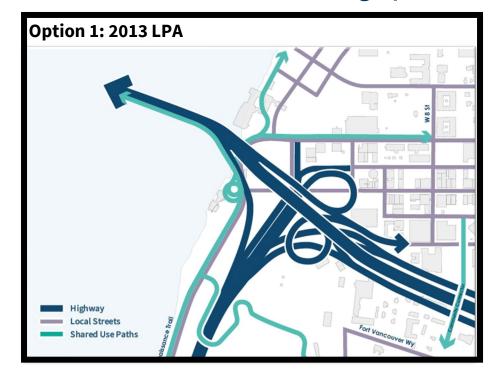

Downtown Vancouver

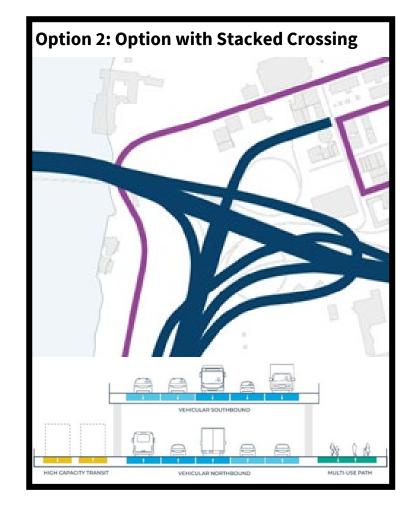

Options consider ways to connect downtown into a higher I-5 corridor, necessary for

bridge replacement options

All design options connect the transit and multi-use path to downtown Vancouver

Additional analysis is needed to identify how to connect from downtown into the river crossing options

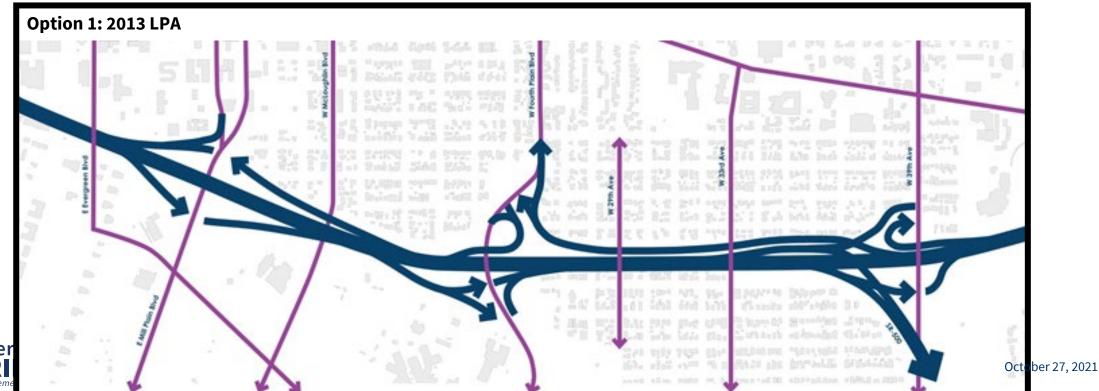

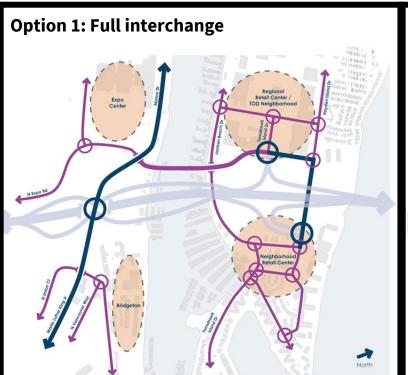

Vancouver Interchanges

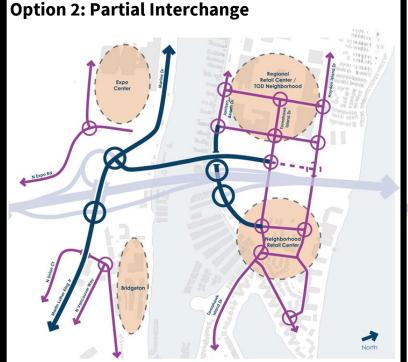

- Reconstructs the interchanges with braided ramps and auxiliary lanes at Mill Plain and Fourth Plain and replaces overpasses at other locations along I-5 leading up to the river
- All designs will improve bike and pedestrian connections to support east to west travel
- Future design work, informed by community engagement, will continue to refine Mill Plain/Fourth Plain intersection improvements and bike/pedestrian connections

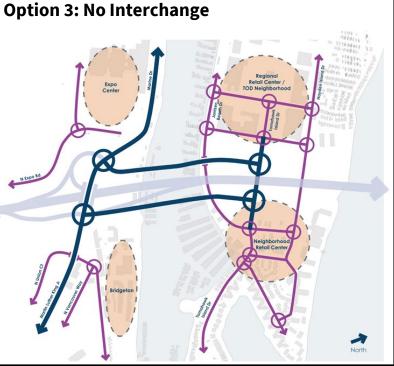

Hayden Island and Marine Drive Interchanges

- Options that consider different ways to access Hayden Island by foot, bike, transit, and car
- All options include replacing the North Portland Harbor Bridge
- ► Future design work, informed by community engagement, will develop details for connecting multi-use paths, with the intention to connect to the 40-mile loop trail

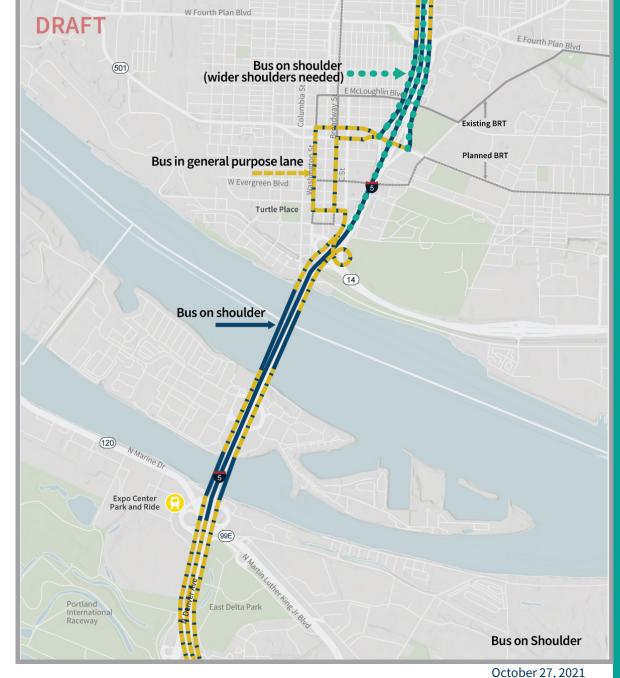

Transit Options - Overview

- The IBR program is analyzing ten transit options:
 - (1) No-Build Option:
 - Assumes no transit improvements from the IBR program but does include other planned transit improvements in the next 25 years. This option is used as a tool for measuring the effects of other options.
 - (1) Bus on Shoulder option
 - (3) Bus Rapid Transit (BRT) options
 - (4) Light Rail Transit (LRT) options
 - (1) BRT/LRT option
- High-Capacity Transit (HCT) options include:
 - Dedicated space for HCT between the Expo Center and Hayden Island
 - Dedicated space for HCT on the replacement bridge
 - Express buses operating on the shoulder of the freeway, where possible in the program area
- Future design work, informed by data, partners, and community engagement, will inform:
 - Specific transit terminus locations
 - Transit termini shown in preliminary list of design options are indicative of general locations being studied for current analysis
 - Transit station details and specific locations
 - Park & Ride size and specific locations

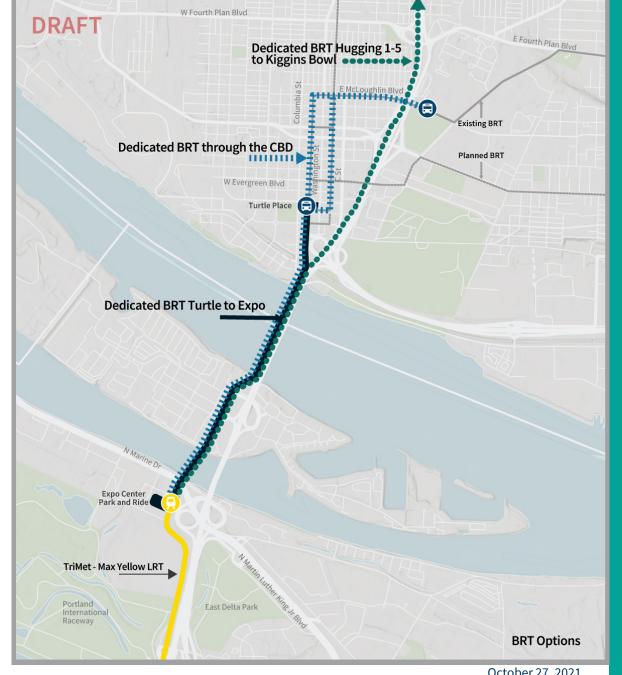

- Bus on Shoulder (BOS)
 - Assumes C-TRAN express routes 101 and 105X operate as bus on shoulder in the bridge influence area (both directions). Route 101 operates from downtown Vancouver to downtown Portland, Route 105X operates from Salmon Creek to 99th to downtown Portland.

3 Bus Rapid Transit (BRT) options:

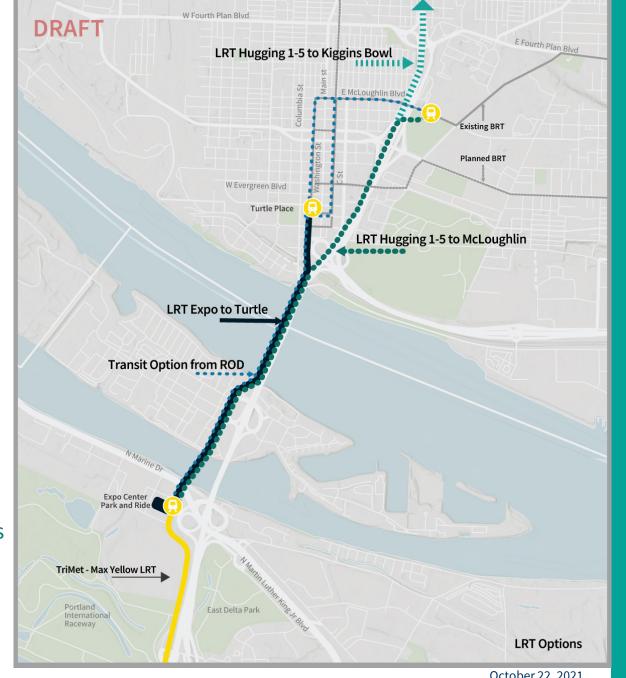

- Dedicated BRT Turtle to Expo
 - Vine BRT lines would extend via dedicated guideway from Turtle Place to a terminus near Expo Center.
- **Dedicated BRT Hugging I-5**
 - Vine BRT lines would extend from Kiggins Bowl south to MAX Expo Center Station on a dedicated guideway adjacent to I-5.
- Dedicated BRT Connection through the Central Business District
 - Vine BRT lines would extend via dedicated guideway from McLoughlin Boulevard through Vancouver's CBD before crossing the river to Hayden Island with a terminus near Expo Centér.

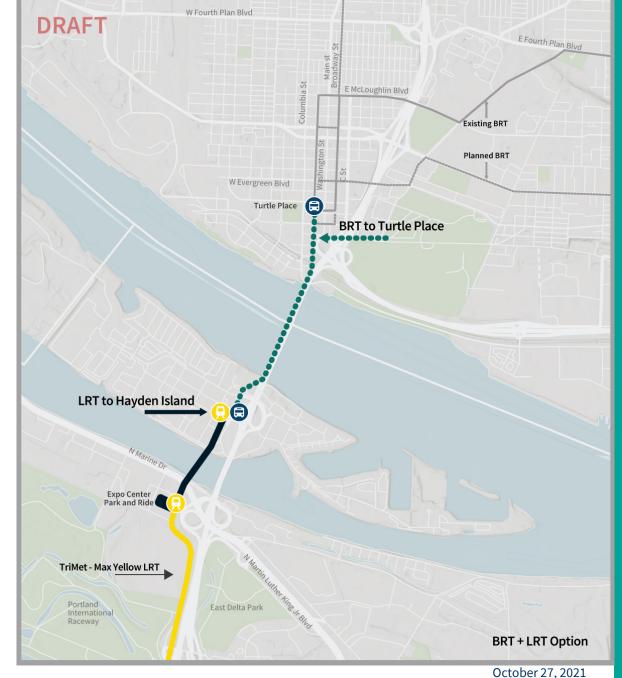

4 Light Rail Transit (LRT) Options:

- The 2013 Locally Preferred Alternative
 - LRT would extend from the Expo Center to a terminus near Clark College.
- **LRT One Station in Vancouver**
 - LRT would extend from Expo Center to Turtle Place.
- LRT Hugging I-5 Near McLoughlin
 - LRT would extend from Expo Center to McLoughlin in a dedicated guideway adjacent
- LRT Hugging I-5 to Kiggins Bowl
 - LRT would extend from Expo Center to Kiggins Bowl in a dedicated guideway adjacent to I-5.

- Dedicated BRT and LRT to Hayden Island
 - Vine BRT lines would extend via dedicated guideway from a station near Turtle place to a terminus on Hayden Island. MAX Yellow Liné would extend from the current terminus at Expo Center to a new terminus on Hayden Island.

Community Engagement on Design Options

- Community feedback will be considered alongside modeling data and screening results to help differentiate between options
 - CAG and EAG
 - Online Open House Starting Late October
 - Community Input Survey November
 - Questions will seek feedback on preferences and priorities associated with the user experience and/or attributes of design options, not a ranking between options
 - Community Briefings November
 - Includes program events and listening sessions co-hosted with community-based organizations serving communities of concern
 - Community Working Groups
 - Active Transportation, Hayden Island/Marine Drive, Downtown Vancouver, Multimodal Commuter
 - Freight Focus Group

Feedback and Guidance:

Do you feel these options provide sufficient space to address changes since the previous project ended?

Next Steps

Greg Johnson, Program Administrator

Ryan LeProwse, Transportation/Planning Lead

Upcoming Meeting Topics

Proposed future meeting topics:

- November
 - Modeling overview
 - Overview of traffic data, including origin/destination patterns
- December
 - Update on governance structures study including examples such as bridge authority, bi-state agreement and interstate compact
 - Economic Impact Study
- Future Meetings
 - Progress in moving toward the IBR Solution

Origin / Destination Travel Patterns

- License plate information was collected in 2005 during previous planning on I-5 between SR 500 and Columbia Boulevard and all the ramps in between.
 - Ramp to ramp information was used to determine individual ramp origin/destination patterns
 - It was used to determine if adjacent ramps could be braided and what changes might be needed due to those designs
 - It was used to determine if ramps could be removed
 - The license plate survey was not used to understand regional travel patterns as that level of information was developed using the Metro/RTC regional travel demand model.
- ▶ The IBR program is collecting cell phone (Big Data) data available from 2016 to 2021.
 - Big data uses sampled anonymized location records from smart phones and navigation devices in connected vehicles.
 - This data will be analyzed and used to address similar questions as the license plate survey completed during previous planning in 2005 (ramp to ramp movements within the IBR program area).
 - It will also be used to provide regional travel pattern information and to validate the Metro/RTC regional travel demand model.
 - The regional travel patterns will be summarized by geographical areas

Next Steps Beyond March 2022

- Environmental work and timelines
 - IBR solution advances through NEPA in 2022 for additional analysis of impacts and benefits. Current timeline anticipates the Supplemental Final EIS being published in late 2023.
- Additional development of design details—mid-2022 through mid-2024
 - Additional development of design details: ex. bridge type, active transportation facilities and connections, affected local roadways, transit station locations and size, off-site improvements
- Funding needs and timelines in anticipation of 2023 sessions
 - The program will be updating the conceptual finance plan in late 2022 in preparation for the
 2023 OR and WA legislative sessions and potential funding conversations
- ► Tolling/pricing discussions and timelines ongoing through 2025
- Community Workforce Agreement—begin late 2022, through 2024
- ► Construction contract requirements, including DBE goals—late 2023 to mid-2025

Feedback and Guidance:

What other topics would you like to discuss at future meetings?
