

Documents That Show Correlation Between COVID and 5G Radiation

A peer-reviewed article was published that shows a statistically significant correlation between 5G antennas and coronavirus:

COVID-19-attributed case and death rates for the U.S.A. were analyzed through May 2020 in three ways – for all 50 states, the country’s largest counties, and the largest counties in California – and found to be statistically significantly higher for states and counties with compared to those without 5G millimeter wave (mmW) technology. [COVID-19 Attributed Cases and Deaths are Statistically Higher in States and Counties with 5th Generation Millimeter Wave Wireless Telecommunications in the United States. | Medical Research Archives](https://esmed.org/MRA/mra/article/view/2371)
