To whom it may concern

I have lived in my place for almost 6 years and now my landlord wants to kick me out. This pandemic has been rough and even though I'm not the only one affected but I also understand my landlord position. But to send me threatening letters stating him and his friends are going to throw me out. Harrassih me having ppl come to my house all hours of night. I have a child who has mental issues. I am unable to work due that her condition needs to be balanced out. This is causing so much pain on me and emotional stress and he doesn't want me to seek help from state. He refusing to fill any paperwork out.

Thank you For your timeSwipe
