

Please do not enact the single payer insurance system in our state. It is a slippery road to socialism and this is another step towards it. Canada has this system and it is not working well. If you have something serious and you live in Canada they are coming to our country for care. If this health system comes to fruition the good doctors will relocate to a different state so they can be compensated fairly for their work. Our state government is having a lot of problems running the state programs it has now. Look at the DMV. Our state has the worst DMV department in the country. Child protective services has failed. The prison system is in trouble. Now we have hard drugs that people are not getting punished for. Unfortunately these are just the tip of the iceberg. I beg you to leave the health care system alone. Richard F. Eberhard [REDACTED]
