

Hi!

Not sure if this email is going to be read aloud or not, but here's my two cents:

Oregon DESPERATELY needs publicly-funded, comprehensive single-payer health care.

Ensuring that all Oregonians have insurance (universal health care) is not enough because as a whole, it costs Oregonians more to have universal health care than single-payer.

The self-serving for-profit insurance corporations need to be removed from the equation to save us all money. Not to mention, costs go down when everyone chips into the same pot.

Furthermore, it is also indecent for coverage to not be equitable. No human being deserves to have better health care coverage than another.

In addition, we also want want the single-payer coverage to be comprehensive, including medical, behavioral health, dental, vision, reproductive, and addiction treatment because Oregonians deserve complete care and not fragmented care.

Lastly, single-payer should also cover undocumented immigrants as well because they're human beings who greatly contribute to our state and they deserve to be treated as such.

Thank you.

Shaundi W.
Oregon Resident
