

Joint Interim Committee On The Interstate 5 Bridge

Please forgive my persistence and proliferation of analysis. Hope my analysis fills a fact void of IBR bridge options.

An immersed tunnel will be safer (kill and injury fewer people), have less impact on the environment, and cost less.

Please talk with our British Columbia neighbors, they chose a new immersed tunnel vs. a bridge to cross the Fraser River.

*See attachments - a few bridge problems*

Respectfully  
Bob Ortblad MSCE, MBA
