Subject: Interstate Bridge Replacement Program Communication Response

Hello Margaret,

Thank you for sharing your question with the Interstate Bridge Replacement (IBR) program. Replacing the aging Interstate Bridge across the Columbia River with a modern, earthquake resilient, multimodal structure that improves mobility for people, goods and services is a priority for the region.

Historical documents related to CRC, including FEIS documents, are available on the [WSDOT website](#). The IBR program will continue to utilize past work in order to maximize investments while also analyzing what has changed since previous planning efforts and addressing impacts related to those changes. In the coming months, the IBR program anticipates a Modified Locally Preferred Alternative (LPA) will be endorsed and advanced to the next stage of the National Environmental Policy Act (NEPA) process. Additional environmental and technical analysis will be conducted in order to produce a Supplemental Draft Environmental Impact Statement (SDEIS). The SDEIS will be available for public review and comment.

Thank you again for taking the time to reach out. We value your feedback and encourage you to stay involved with the program through the following methods:

- Sign up for the IBR Program [mailing list](#) to receive periodic communications about the program via email.
- Follow us on [Facebook](#), [Twitter](#), [Instagram](#), [TikTok](#), or [LinkedIn](#).
- Attend an [Equity Advisory Group](#), [Community Advisory Group](#) and [Executive Steering Group](#) meeting. All meetings are open to the public. Meeting dates and times, materials and participation information are posted in the [events calendar](#).

Thank you,

Interstate Bridge Replacement program
