

DEQ Implementation of HB2021

Colin McConnaha

Oregon Department of Environmental Quality

House Energy & Natural Resources Committee

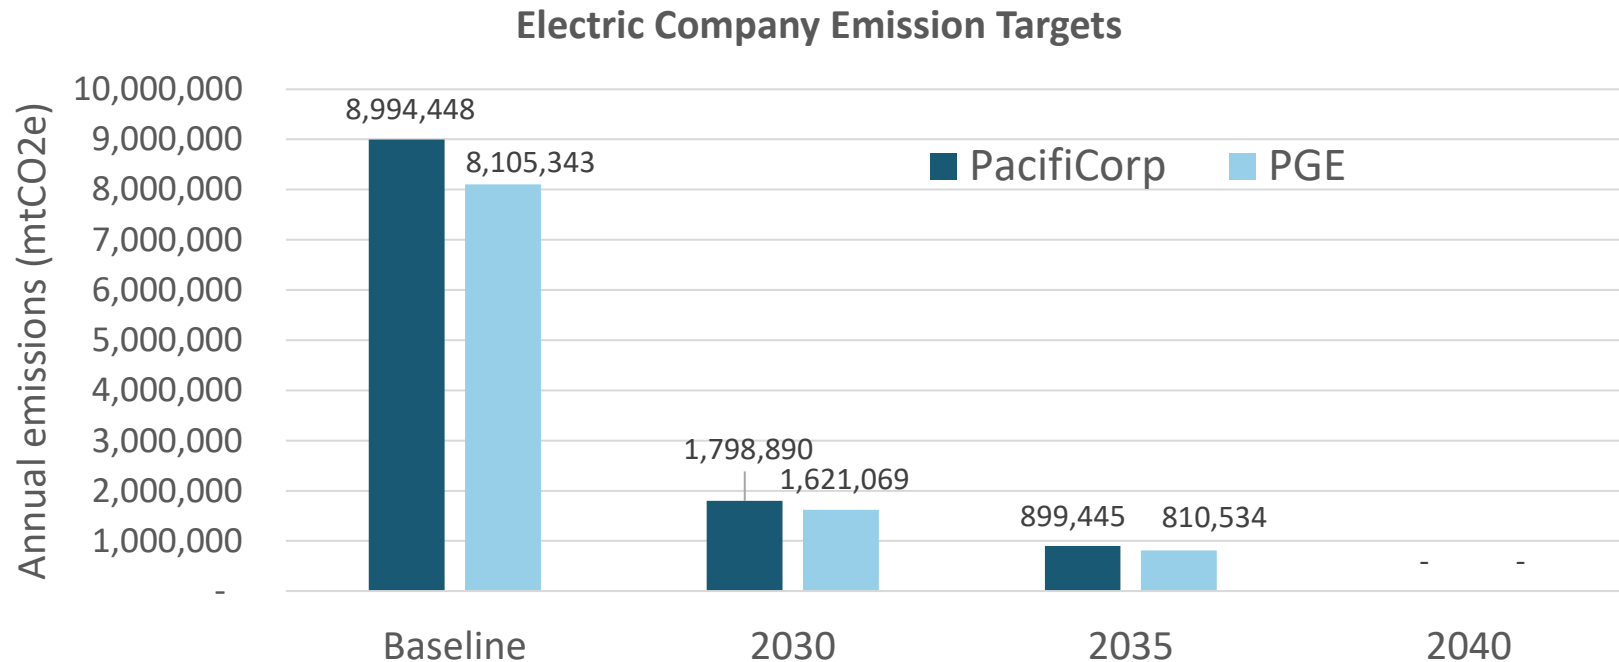

June 1, 2022

DEQ Role in HB 2021

- Determine baseline emissions for electric companies (PGE & PacifiCorp)
 - Using 2010-2012 avg annual emissions reported to DEQ for those years
- Baseline for electricity service suppliers is 0.428 mtCO₂e/MWh
- Determine amount of emission reductions to meet clean energy targets
 - 2030: 80% reduction
 - 2035: 90% reduction
 - 2040: 100% reduction
- Verify projected GHG emissions in the plans filed submitted to the PUC by electricity providers
- Share annual GHG emissions reported by electricity providers to the PUC

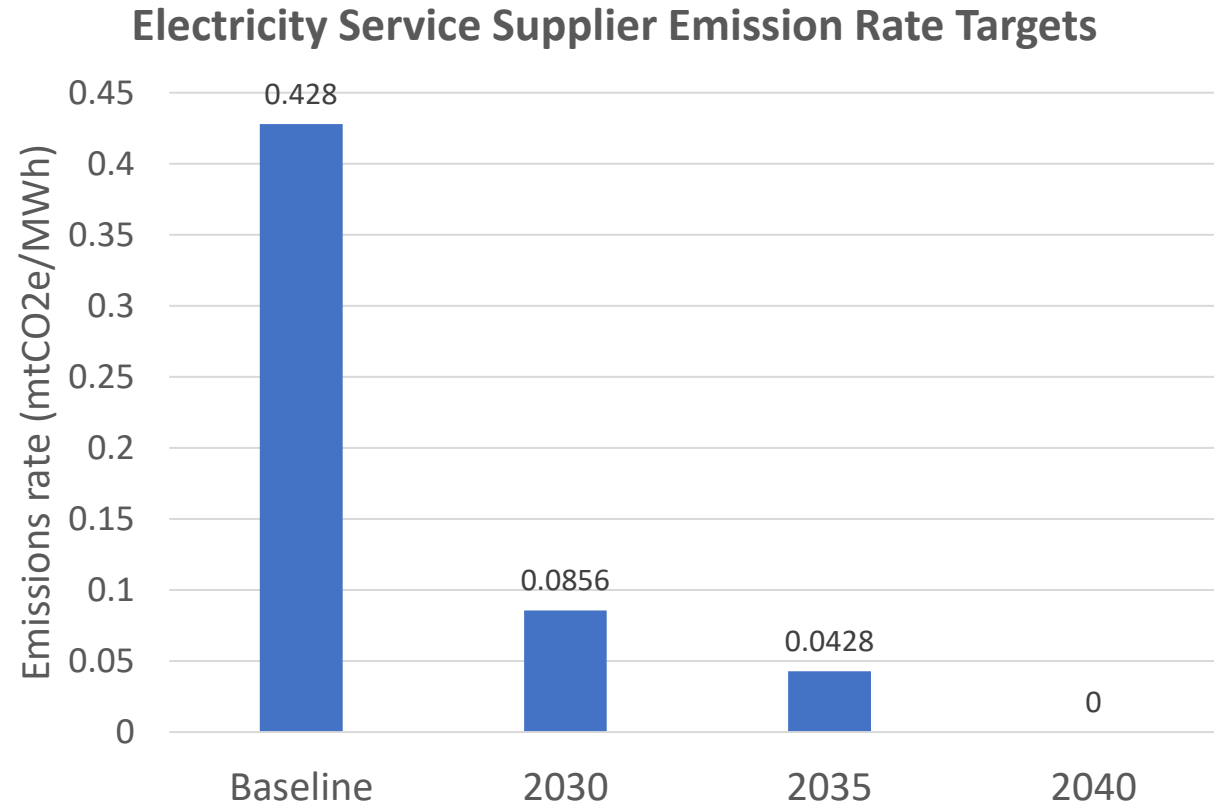

Progress thus far

- DEQ issued Department Order identifying:
 - Baselines for PGE & PacifiCorp
 - Emission reductions required by 2030, 2035 and 2040

Progress thus far

- DEQ Department Order also identifies emission rate targets for Electricity Service Suppliers:
