

Task Force Recommendation:

Given the problems with the existing health care system identified in public input, and given the significant potential of a single payer system, the Joint Task Force on Universal Health Care recommends that the 2023 Legislature appoint a governance board consistent with SB 770 (2019) to complete a full single payer implementation plan for review and consideration by the 2025 Legislature.

The following suggestions from the task force are included as to the formation of such a board.

(Include Santa proposal here)
