

Just found out about your plans. How did the State Gov. become the arbiter of a private enterprise? Why would the state do this to their citizens in the dark? My comment is Oregon has enough to do just keeping up with its constitutional duties without eliminating choice in what's a very private issue for the citizens. It doesn't end with the Ins., we all know this. So stop trying to do things outside the stated duties in the state constitution. Just start doing what's required and stop with the socialism. We don't need a nanny, we need good leadership and a responsive Gov. Universal health care has been tried in other states, can you show a single example of a state that's done it successfully, or is still doing it successfully? I'll wait, I didn't think so. Is the state going to mess with us that are on Medicare too? When is Oregon going to drag itself off the bottom of the countries education, housing and policing? Citizen of OR since 1979.
