

while the thought of universal healthcare for all is appealing, the fact that the conversations on how to defund it with tax dollars is being kept quiet is disturbing. IF this is such a valuable idea then ALL Oregonians need to be aware of and participate in the discussions. Oregonians are already struggling with rising prices for everyday necessities, with no relief in site. So, increasing our taxes even more is an outlandish idea that even the task force realizes in keeping the discussions hush hush!

It is never a good idea to push thru programs that must be funded on the backs of working people without their voices being heard. Too much damage has already been to Americans by politicians and those deemed to be experts in the past two years, and nothing has improved for the average American.

Please stop now and make your plans fully public. The people of Oregon are watching.

M. Rosenstiel DNP
