

I'd like to point out that it isn't the government's job to provide health care or get so deep into individual lives. This task force is stripping our liberty and freedom and even what you call democracy all to give the government more power and control. You care nothing about a person's health, otherwise you would start with how your control is damaging the brain and the ability to care for oneself. You are damaging people by taking away their responsibility to make good choices and own them. You are damaging people that do take responsibility by making them pay for those that don't. Rather than provide government health care (which isn't healthy), quite driving businesses out of the state so jobs are available that pay for health insurance.
