

I see your draft excludes how much extra we will have to pay in taxes. I understand that since I am on Irma already I will have to pay up to 16% of my income to the state in addition possibly to my Medicare. This will significantly increase my monthly expenditure to the point where I will likely need to leave Oregon

Please call me and tell me how you expect this to affect Medicare people, we should not be paying more than we would pay if we were on Medicare and a Pers retiree premium

Sounds like we're gonna be soaked

Please note that under Medicare Irma my increased cost would be significantly less than the tax would be in Oregon. Significantly.

The other emails I have sent please need to be read. Just universal healthcare is a rip off for retirees!!!!

<https://www.cms.gov/newsroom/fact-sheets/2022-medicare-parts-b-premiums-and-deductibles2022-medicare-part-d-income-related-monthly-adjustment>

This is Irma for only part B not part D. The first threshold starts way above where your 400% poverty level is. People pay 0 to about \$300 for a medical or Medicare advantage plan.

This will be a significant disadvantage to single and married people retires alike. A person getting a pension for Social Security will give you 10 to 15% of their income when they would have to pay significantly less if they simply got to stay on Medicare. They will be unable to withdraw from retirement accounts as they will lose 50 percent to state and federal taxes. They already lose 36 percent!!!!'.

If the person happened to make \$150,000 they would still pay significantly less for their healthcare. This is a rip off!
