

Good morning,

Are we as a government looking for our residence to leave the State ? Or maybe I should rephrase and say, are we as a government looking for our upward Mobil residence to leave the State ! Listen folks, who sets around thinking of new and better ways to increase our taxes to pay for a much lesser quality product . This program will put the burden on the middle class and Business therefore slowing our economy in the area of jobs and income, not to mention Big business looking to relocate . Oregon will lose the hard working upper Mobil citizens and replacing them with low income individuals who are looking for free health care , loose ,loose . Not to mention the State of Oregon will facilitate the program if it passes , if that's not the biggest red flag in understanding the budget numbers that are shown a way under valued !! People while I understand there is a need for helping the under privileged and disadvantaged we need to find another way to feel this need. We are growing weary of electing officials who can't think outside the box and believe these programs are unique . Wrong idea , wrong times !!
