

# Second Policy Interest Survey

- Memo and Interest Survey Distributed Friday, September 16<sup>th</sup>
- Twenty-Six Task Force Members Responded to the Survey

# Existing Buildings Policy Interest Survey

Policy Title	Least Int. (Q1)	Most Int. (Q2)	Next Steps
Building performance standards	9	16	-Highest Level of Analysis
Promote, incentivize, and/or subsidize energy efficiency and heating/cooling efficiency increases	0	15	
Align energy efficiency programs with State's climate goals	4	14	
<i>Promote, incentivize, and/or subsidize heat pumps</i>	6	13	-Included in the new building survey -Will Possibly Receive Higher Level of Analysis Based on Results of Subsequent Interest Survey
<i>Modify Energy Trust of Oregon's mission</i>	7	13	
<i>Create public climate or environmental justice hubs</i>	4	12	
<i>Further enhance the efficiency of appliances and equipment</i>	12	12	
<i>Evaluate hybrid natural gas and electric energy system</i>	11	12	
<i>Enact residential or expand commercial PACE financing</i>	1	8	
<i>Promote, incentivize, and/or subsidize air purification systems</i>	5	8	
<i>Benchmarking and disclosure</i>	0	7	
Advanced metering infrastructure	3	4	Included in report at the current level of detail
Building electrification study	19	1	

## Second Policy Interest Survey Outcomes

Policy Title	Least Int. (Q1)	Most Int. (Q2)
Decarbonize institutional/public buildings	0	24
Promote, incentivize, and/or subsidize heat pumps	1	20
Modify Energy Trust of Oregon's mission	1	14
Promote, incentivize, and/or subsidize air purification systems	2	14
Assess and disclose material-related emissions	1	13
Enact energy-efficient building codes	2	13
Modify agency operations and code development process	11	12
Create public climate or environmental justice hubs	2	11
Further enhance the efficiency of appliances and equipment	12	11
Focus on refrigerants with low global warming potentials	1	7
Study and expand grid system/sources	10	5
Evaluate hybrid natural gas and electric energy system	13	4
Modify Building Codes Division advisory boards	12	4
Limit allowable total carbon of buildings	11	4
Enact residential or expand commercial PACE financing	13	3
Benchmarking and disclosure	0	3
Establish workforce development requirements	1	2
Use a points-based residential code	8	2
Maintain the status quo	14	2
Permit local adoption of the reach code	12	0

# Policies to be Further Analyzed

- Building performance standards
- Promote, incentivize, and/or subsidize energy efficiency and heating/cooling efficiency increases
- Align energy efficiency programs with State's climate goals
- Decarbonize institutional/public buildings
- Promote, incentivize, and/or subsidize heat pumps
- Modify Energy Trust of Oregon's mission
- Promote, incentivize, and/or subsidize air purification systems
- Assess and disclose material-related emissions
- Enact energy-efficient building codes

# Policies to be Included at the Current Level of Detail

- Modify agency operations and code development process
- Create public climate or environmental justice hubs
- Further enhance the efficiency of appliances and equipment
- Focus on refrigerants with low global warming potentials
- Study and expand grid system/sources
- Limit allowable total carbon of buildings
- Modify Building Codes Division advisory boards
- Evaluate hybrid natural gas and electric energy system
- Benchmarking and disclosure
- Enact residential or expand commercial PACE financing
- Establish workforce development requirements
- Use a points-based residential code
- Maintain the status quo
- Permit local adoption of the reach code
- Advanced metering infrastructure
- Building electrification study
