

Vote YES on LC 2309!

**Ensure that the 2.5% of dedicated video lottery proceeds reach our Counties –
Continue key investments in local economic development.**

PROBLEM: Under ORS 461.547, the State must transfer 2.5% of net video lottery proceeds to counties for economic development investments. This legislative action by the 1991 Legislature was largely reflective of an agreement between counties and the state when counties gave up their authority to authorize, regulate and tax lottery gaming. The statute also proscribes how the dollars are distributed – with 90% going to each county in proportion to the gross receipts from video lottery games from that county and 10% distributed in equal amounts to each county.

However, since 2011 this allocation to counties has not been distributed according to the formula the statute proscribes. The statute is regularly suspended and distributions based on a fixed appropriation with no “true up” or “true down” mechanism in place. Over the past several biennia, counties have lost over \$15 million in vital funding for economic development-related programs due to this practice...and on years when the forecasts don’t match receipts, like what we experienced during COVID, the State overpaid upwards of \$10M.

Biennium	Video Lottery Sales	2.5% of Video Lottery Sales	County Disbursement	Over/Under 2.5% Formula
2007-09	\$1,723,944,558	\$43,098,614	\$42,025,558	\$0
2009-11	\$1,421,058,679	\$35,526,467	\$29,503,328	\$0
2011-13	\$1,460,488,183	\$36,512,205	\$37,118,584	+\$1,534,716
2013-15	\$1,522,342,736	\$38,058,568	\$33,849,166	-\$2,276,567
2015-17	\$1,762,372,375	\$44,059,309	\$39,083,827	-\$2,946,273
2017-19	\$1,886,888,891	\$47,172,222	\$41,285,992	-\$4,024,256
2019-21	\$1,596,910,798	\$39,922,770	\$50,231,366	+\$10,308,596
2021-23**	\$2,438,354,321	\$60,958,858	\$54,209,527	-\$6,749,331

**Video Lottery Sales not final for the 2021-23 biennium.

SOLUTION: LC 2309 allows for the continued ease of administration with an initial fixed allocation with a “true-up” or “true-down” mechanism. This ensures the original legislative intent of 2.5% of net video lottery receipts reaches our counties for economic development purposes. When receipts are high, county payments increase. When they are low, county payments will be suspended in the 1st Quarter of the following biennium.
