

Opening schools might now is not the right thing to do. Mutations of the virus are present in our country and state that have caused shutdowns across the globe. Vaccines are just beginning to roll out. End the year with consistency and keep most students in CDL until school staff, elderly community members, and families of students can be vaccinated with both doses. Keep all Oregonians safe. Thank you for keeping school campuses closed across the state.

Respectfully,

Marisa Real

Parent of a 2nd grader who is getting by with CDL...struggling but well worth the sacrifice for community health
