Dear Committee members

Calling the Fenix Ashland fires a wildfire. Is not an accurate description. It happened in these city's. The only way you can help these people rebuild, is to eliminate any personal fees, regulations, development costs and building codes. Bring into these city's an adequate supply of water so more than 4 fire hydrants can run at the same. Build a modern road system. Do not try to design these roads to restrict traffic like was done recently. Bad road restrictions will just get more people killed during a fire. Get the sheriff to speed up the investigation. They have arrested 2 arsonists setting these fires.
