

Good morning members of the committee,

I live in Central Point, Oregon, and I am a constituent of US Congressional District #2. I simply ask that you strive to make the redistricting process transparent, technology and data-driven, fair, and as free of political bias as possible. I ask that you strive to implement a system that would maximize fairness if it were to be implemented nationwide in every Congressional District. The end result should be neutral to both of the major political parties. Redistricting should be a non-factor in the ongoing struggle for power in which the Republican and Democratic parties continue to participate.

Thank you for your consideration,

Phil Guidotti
