

Dear To Whom It May Concern

We need our representatives to protect our rural communities, do so now. We need representation that understands our concerns, our local economy and way of life our rural communities and to consider those interests in the We have nothing in common with the Metro area and we do not want to bring more of the urban areas into our congressional district.

We want equal and fair community biased redistricting when they draw the new political boundaries. Not a gerrymandered and biased re-drawing of the political boundaries.

Thank you
