

Please, let us continue to be represented as a rural county. Do not change the districts. If anything, there should be a change to our electing of governor. We need an electoral college to give more representation of rural counties. Only 6 or 7 counties elected the governor. It is not right that those few counties control the whole state. Look at a political map of Oregon, it is mostly RED. Columbia county did not elect the current governor, or the current president, it is not a liberal county. If the voting was done right, and not controlled by the liberals, Oregon would be a conservative State.
