

As a resident of Medford, OR, area code 97504 I support the proposal of an INDEPENDENT commission to redistrict. It is essential that it be NON-POLITICAL. Also I do not understand the validity of redistricting without the data from the 2020 census. The basic reason for redistricting is to insure fair representation. How can this be done while ignoring the data on which it should be based? What is the problem with waiting a few months?
