

SB 714 STAFF MEASURE SUMMARY

Senate Committee On Human Services, Mental Health and Recovery

Prepared By: C. Ross, Counsel

Meeting Dates: 3/18, 4/1, 4/6

WHAT THE MEASURE DOES:

Requires staffing ratios in residential and memory care facilities, unless the facility has documented daily implementation of a staffing plan based on its use of an acuity-based staffing tool, as specified, that the Department of Human Services (DHS) is already required to make available. Specifies at least one awake caregiver: for every 7 residents from 7:00 AM to 3:00 PM; for every 9.5 residents from 3:00 to 11:00 PM; and for every 17 residents from 11:00 PM to 6:00 AM. Requires DHS to ensure the required staffing ratios when investigating safety concerns.

ISSUES DISCUSSED:

- The two current staffing alternatives: staff to a minimum level, or use the acuity tool
- Finding the most effective approach to improve safety and care
- Bare number of residents not equating to level of need
- Prioritizing residents: their safety, their voices

EFFECT OF AMENDMENT:

No amendment.

BACKGROUND:

The Department of Human Services (DHS) is currently required to make an acuity-based staffing tool available that it and residential care facilities may use collaboratively to evaluate whether the facility has enough qualified caregivers to meet residents' needs and to share staffing plan information with residents and their families. Use of the acuity tool is required only when DHS and a subject facility disagree about whether staffing is adequate. With respect to endorsed memory care facilities, DHS is currently required to adopt specified standards by rule, with input from the long term care community, to ensure the quality of care meets residents' needs.

Senate Bill 714 imposes required staffing ratios at endorsed memory care facilities and residential care facilities unless the facility thoroughly documents its implementation of staffing ratios in conformity with the acuity tool.
