No amendment.

BACKGROUND:

Current law states that state central committee membership consists of at least two members of each county central committee, as well as other delegates from each county equal to the number of party members in the county registered on the date of the primary election, divided by 1,500. It also states that if the remaining number exceeds 7,500, then one additional delegate shall represent the county.

Senate Bill 313 allows the state central party to designate additional individuals as voting members.
