OPEN GOVERNMENT IMPACT

Legislative Counsel has not adopted standards for drafting measures that establish exemptions from disclosure of public records.

This measure exempts from public disclosure the report that health care providers submit to the Oregon Health Authority regarding an abortion that was performed or attempted to be performed. This measure also allows the court to exempt from public disclosure the identity or any personally identifiable information of a person upon whom an abortion was performed or attempted to be performed in violation of the measure.

If the public records were instead subject to mandatory disclosure under public records law, the public could learn additional information regarding abortions that were performed or attempted to be performed and the identity and personally identifiable information of persons upon whom an abortion was performed or attempted to be performed in violation of the measure.
