

HB 2078 A STAFF MEASURE SUMMARY

Carrier: Rep. Salinas

House Committee On Health Care**Action Date:** 03/04/21**Action:** Do pass with amendments. (Printed A-Eng.)**Vote:** 10-0-0-0**Yeas:** 10 - Alonso Leon, Campos, Dexter, Drazan, Hayden, Moore-Green, Noble, Prusak, Salinas, Schouten**Fiscal:** Has minimal fiscal impact**Revenue:** No revenue impact**Prepared By:** Oliver Droppers, LPRO Analyst**Meeting Dates:** 1/26, 3/4**WHAT THE MEASURE DOES:**

Repeals Oregon Health Authority's (OHA) credentialing information program. Requires Pain Management Commission to develop a one-hour training for health professional regulatory and other health boards; specifies applicable types of practitioners. Requires curriculum to take into account the needs of groups disproportionately affected by adverse social determinants of health and related factors that influence how individuals experience chronic pain. Requires licensed practitioners to complete pain management education program at initial licensure and every 36 months thereafter. Removes annual reporting requirement of the Oregon Health Information Technology program. Modifies definition of temporary employee for determining benefit plan eligibility in Public Employees' Benefit Board (PEBB) to align with federal law.

ISSUES DISCUSSED:

- Curriculum review of pain management trainings by licensure boards
- Proposed one-hour training for required practitioners; best practices for providers
- Alignment of Oregon law with federal law related to PEBB coverage and temporary workers
- Restricting licensure boards from requiring licensees to complete pain management trainings more often than every 36 months
- OHA's outreach to providers about the proposed changes in the measure

EFFECT OF AMENDMENT:

Modifies reference to people of color and tribal communities as a curriculum consideration. Clarifies when licensed practitioners are required to complete pain management education program.

BACKGROUND:

The Oregon Health Authority's (OHA) Office of Health Information Technology (OHIT) program was created in 2011 and is responsible for facilitating electronic exchange of health information, promoting standards and policies around privacy and security of health information, and supporting improved health outcomes using health information technology (ORS 413.310). Senate Bill 604 (2013) required OHIT to establish a Common Credentialing Program for credentialing organizations (e.g., health plans and hospitals) to access the information necessary to credential or re-credential all health care practitioners in the state. The program was intended to simplify the administrative processes related to credentialing, reduce burden on practitioners, and eliminate duplication for credentialing organizations. House Bill 2294 (2015) requires OHIT to submit an annual report to the Legislative Assembly on the program's status. In 2018, OHA evaluated the proposed credentialing program's cost-effectiveness and decided to suspend the program permanently.

The Oregon Pain Management Commission manages a statewide pain management education program curriculum for use by licensed health care professionals that includes a one-hour web-based pain management

HB 2078 A STAFF MEASURE SUMMARY

module. House Bill 2265 (2019) added optometrists to the list of professionals required to complete pain management training.

Oregon's Public Employees' Benefits Board (PEBB) designs, contracts, and administers various benefits for state employees, including medical and dental coverage. In 2019, PEBB's total membership was approximately 139,000 individuals.

House Bill 2078 A repeals the Common Credentialing Program, updates pain management training for health care practitioners, and modifies the definition of temporary employee for coverage eligibility in PEBB.
