(d) To allocate equalized floors to low income residential housing use, divide the total square footage of low income residential housing property in the project by the square footage of an equalized floor, without rounding this quotient up or down. In determining the square footage of low income residential housing property, include that proportion of the square footage of residential common space that is the same as the proportion of the total square footage of low income residential housing units to the total square footage of all residential housing units.

(e) Land that is necessary for a project having at least one equalized floor of low income residential housing may be certified for partial exemption. Land that is not necessary for the project may not be certified for partial exemption.
