Limits cost-sharing for health benefit plan coverage of insulin prescribed for treatment of diabetes.

A BILL FOR AN ACT

Relating to the cost of insulin.

Whereas almost 20,000 Oregonians are diagnosed with diabetes each year; and
Whereas as of January 1, 2018, more than 435,000 adults in Oregon have been diagnosed with diabetes and another 100,000 are undiagnosed but living with the disease; and
Whereas every Oregonian with Type 1 diabetes and many with Type 2 diabetes rely on daily doses of insulin to survive; and
Whereas the annual medical costs related to diabetes in Oregon are $4.3 billion; and
Whereas insulin prices rose by 45 percent between 2014 and 2017 and, over the past 14 years, the price of insulin has risen by 550 percent, adjusted for inflation; and
Whereas one in four individuals with Type 1 diabetes have reported using less than the prescribed amount of insulin due to the high cost of insulin; and
Whereas it is important to implement state policies that reduce the costs for Oregonians with diabetes to obtain life-saving and life-sustaining insulin; now, therefore,
