Establishes Oregon Brain Injury Trust Fund Board to administer programs paid for by Oregon Brain Injury Trust Fund to provide service coordination and skills training to individuals with brain injuries, provide educational information to increase awareness and understanding of issues and needs related to brain injuries and to provide grants to support research into treatment of brain injuries.

 Declares emergency, effective on passage.

A BILL FOR AN ACT

Relating to brain injuries; creating new provisions; amending ORS 137.300; and declaring an emergency.

Whereas finding treatment and medical care can be incredibly difficult for survivors of traumatic brain injury; and

Whereas beyond finding treatment, the cost of treatment is often very high, meaning that individuals with more resources at their disposal are far more likely to get the care they need; and

Whereas our complex health care system is in many ways even more complex when it comes to brain injury recovery and this creates a need for service coordination for patients and skills training for providers and administrative health care staff; and

Whereas increased efficiency would save money for low-income patients and for taxpayers who support publicly funded health care programs; and

Whereas brain injury science is a fast growing body of research, but there is still so much to learn; and

Whereas supporting brain injury patients also requires investments in brain injury research to continue learning the most effective way to support patients’ recoveries; now, therefore,

Be It Enacted by the People of the State of Oregon:
