13 (1) When a source person, after having been first requested to consent to testing by rules
14 adopted under ORS 433.065, has refused or within a time period prescribed by rule of the authority
15 has failed to submit to the requested test, except when the exposed person has knowledge that the
16 exposed person has a history of a positive HIV test, the exposed person may seek mandatory testing

The judge may examine witnesses to insure a full inquiry into the facts necessary for a determination of the matter before the court.

12 (8) After hearing all of the evidence, the court shall determine the truth of the allegations contained in the petition. The court shall order the respondent to submit to the requested test by a licensed health care provider without delay if, based upon clear and convincing evidence, the court finds that:

16 (a) The allegations in the petition are true;

17 (b) The injury the petitioner is suffering or will suffer is an injury that only the relief requested will adequately remedy; and

19 (c) The interest of the petitioner in obtaining the relief clearly outweighs the privacy interest of the respondent in withholding consent.
